The British Veterinary Association

Members of the profession who are not yet members of the British Veterinary Association are invited to consider the advantages of joining this body. In addition to the personal aspect is the substantial benefit to the whole profession if all, or at least the large majority, of its members are represented by a central Association.

Under modern conditions when veterinary surgeons have dealings with representatives of the Government or of national bodies there is an obvious advantage in being associated with a single negotiating body having friendly and continuous contacts with the appropriate Ministers and with outside organisations of all kinds. It is through the unity of its members, and their number, that the British Veterinary Association is able to safeguard and to promote the interests of all veterinary surgeons.

THE VETERINARY RECORD, which is the only weekly publication in the world devoted exclusively to the art and science of veterinary surgery, is sent free to all members of the Association. Its contents regularly comprise scientific and laboratory articles, clinical communications, reviews of the current literature, news of topical events of professional interest, and correspondence. The ordinary purchase price of THE VETERINARY RECORD is 2s. per week or £5 4s. per annum, so it will be seen from the subscriptions quoted below that membership of the Association is an economy even on the single ground of obtaining THE VETERINARY RECORD.

In addition to THE RECORD, the Association publishes Handbooks from time to time, reviewing the present state of knowledge in the various branches of veterinary science. Such Handbooks are available to members either free of charge or at reduced prices.

There are special schemes for personal accident and sickness insurance, and for motor car and other insurances, all of which are available to members on especially advantageous terms.

The new headquarters of the Association is a commodious and dignified house which members are invited to visit at any time, and where the General Secretary and his staff are available for advice on individual problems.

The subscription rates to the British Veterinary Association are as follows:—

Normal annual membership	4 guineas per annum.
Recently qualified new members	2 guineas for the first year after graduation. 3 guineas for the second year.
Members resident overseas	3 guineas per annum.
For husband and wife, both veterinary surgeons, a joint subscription	6 guineas per annum.
Members over the age of 65	2 guineas per annum.
